Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The preliminary amendment has been entered. Claims 1-4 were cancelled and claim 5 was amended. Claim 5 is pending.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claim 5 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 5 sets forth a luminescent material containing layer and a layer comprised of a mixture of "filter material" and "transparent material". It is not seen where the specification expressly describes a layer comprising a mixture of "filter material" and "transparent material". The specification states the filter 3 can be "white layers" which are pigmented with titanium dioxide (see specification page 9, top of page). This statement in the specification does not provide support for the current claim, because titanium dioxide is not set forth as a "filter material" specifically and the filter is described as white, not transparent. The other discussion in the specification of the filter layer 3 states the filter includes "very precisely controlled air bubbles" (see specification page 8, bottom of the page). This filter layer is considered to comprise only one material with air bubbles and does not comprise a mixture of "filter material" and

"transparent material". The layer comprising filter material and transparent material presently set forth in claim 5 is considered to be new matter.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claim 5 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The word "substantially" in the phrase "mixed substantially homogeneously" renders the claim indefinite. The term "substantially" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. Clarification and/or correction are required.

Allowable Subject Matter

6. The examiner has found the embodiment described in the specification of the film formed of a filter layer comprised of air bubbles wherein the filter is the image receiving layer and is disposed over a luminescent layer to be allowable subject matter. The examiner does note, however, that the present claim is not drawn to this embodiment of a filter layer (see 35 USC 112, first paragraph rejection above).

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
